### ASBESTOS UPDATE October 2016

Approximately 20 linear feet of asbestos containing caulk around a ventilation louver, and approximately 25 square feet of asbestos containing built-up roofing material under a fan were removed from the roof of the Osborn School as part of the Furnace Replacement Project.

Approximately 20 linear feet of asbestos containing pipe insulation under toilets was removed from the Midland School.

In accordance with the Federal Asbestos Hazard Emergency Response Act (AHERA) (40 CFR 763) and the Environmental Protection Agency (EPA), the Rye City School District performed its triennial re-inspection of all previously identified asbestos-containing building materials (ACBM) and submitted an asbestos reporting form to the Commissioner of Education (§3602-a of Chapter 53 of the Laws of 1990).

All buildings leased, owned or otherwise used by the Rye City School District shall receive six month visual surveillance inspections of all ACBM in December and June.

All newly hired permanent custodial staff receives asbestos awareness training within 60 days of first employment.

Copies of the asbestos management plan are available for review at all school main offices and at the Central Administration Building. Any questions or concerns about asbestos in RCSD buildings should be directed to Samuel Carder at 967-6100 ex 6272.
